

STORAGE TENSORS

Compact types/ BRG Roller types/ Long Arm types

APPLICATION

*For Braiding machine, Winding machine,
Twisting machine, Narrow Fabric, Weft-feeder etc.*

A302060/A403010 - Compact types

- * Standard model and widely used in the world.
- * The maximum storage 310mm.
- * Stronger tension than C709020 / C802001
- * Stepped dial - A302060 / Stepless dial - A403010

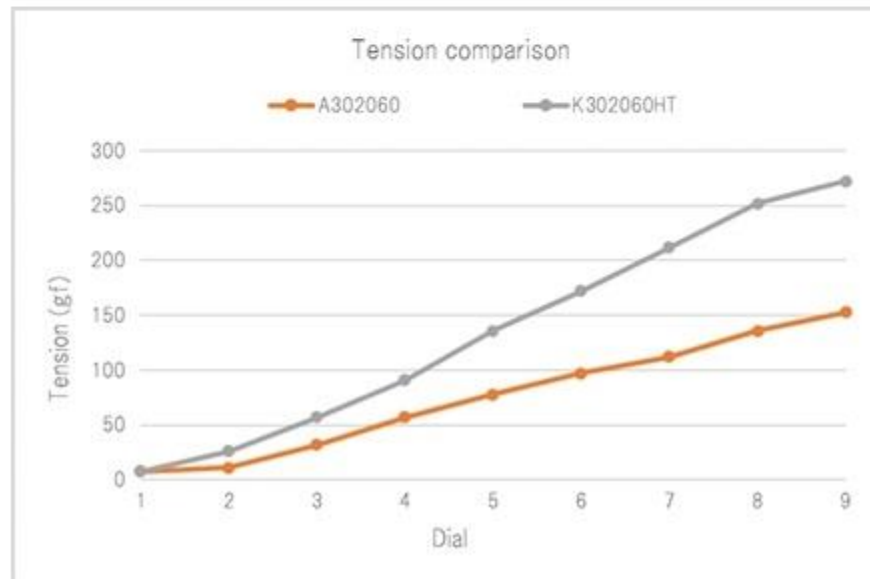

K302060HT - Compact type with STRONGEST TENSION

- * Strongest tension – about 1.8times of the current model (A302060/A403010)
- * The maximum storage is 310mm (Same as A302060/A403010)
- * The arm is made with reinforced plastic
- * Stepped dial only

<CONDITIONS>
YARN; PET1500T380f
SPEED; 20m/min.
IN TENSION; 3gf

STORAGE TENSORS

Compact types/ BRG Roller types/ Long Arm types

APPLICATION

*For Braiding machine, Winding machine,
Twisting machine, Narrow Fabric, Weft-feeder etc.*

D105202/D105203 - BRG Roller types

- * Less tension and More stable tension with BRG Roller.
- * Less yarn/wire damage with Diamond Polished eyelets and pins. (D105203)
- * Both models have stepped dial to adjust tension.
- * Recommended for Medical yarn, Elastic yarn and Wire etc.

C709020/C802001 - Long arm types

- * Light tension with the big storage - Max.665mm.
- * Less chattering / More stable tension due to less angles.(compare with compact types.)
- * No pre-tensor is required due to 12 yarn bending positions.
- * Compact body and Easy mounting for any space and direction.
- * Easy to adjust tension with dial. (C709020 - Stepped, C802001- Stepless).
